

2021

A Day in My Life...

As a high school senior
during the COVID-19
pandemic

Good Morning A Period Statistics

After my alarm goes off at 8:10, I start my day with Statistics at 8:15. It definitely is nice not having to get ready and drive to school, however it's very hard to stay awake for a Statistics lecture that early in the morning.

Breakfast

This is the first thing to get me out of bed in the morning. My breakfast is generally very small because I don't have much of an appetite in the morning.

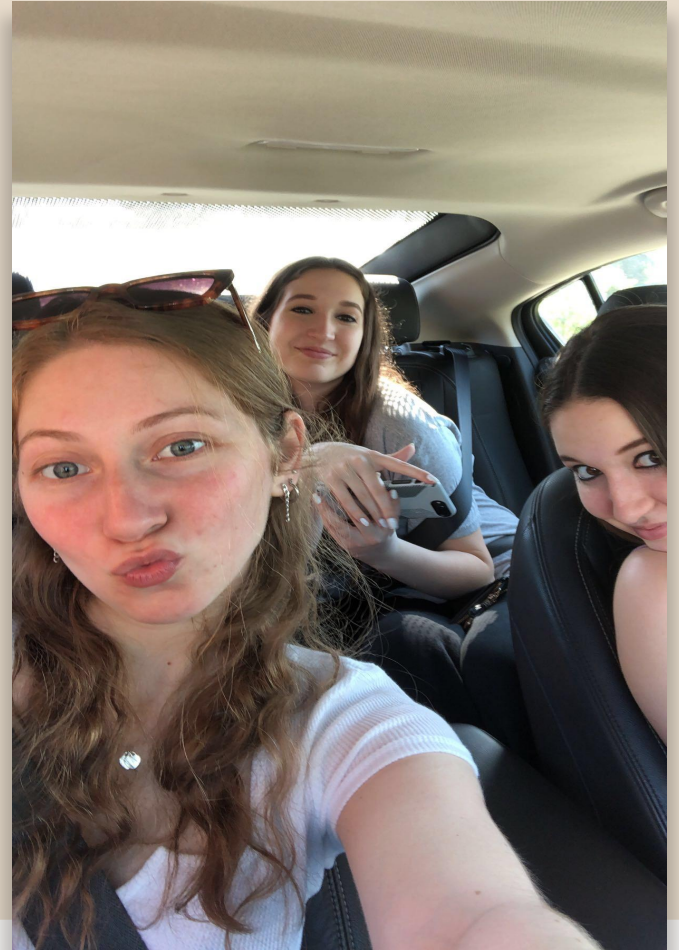

Luna's Nap Time

My dog Luna seizes the opportunity to take a nap on my bed when I am sitting at my desk for third or fourth period. She usually stares at me until she dozes off for an hour or two.

Starbucks Run

Three friends and I go to the Starbucks drive-thru almost every day after school. This is one of my favorite parts of the day because I get to talk with my friends and spend some time with them. We try to do this together as often as we can since we are all very busy with school, work, and sports. This part of my day is something I always look forward to.

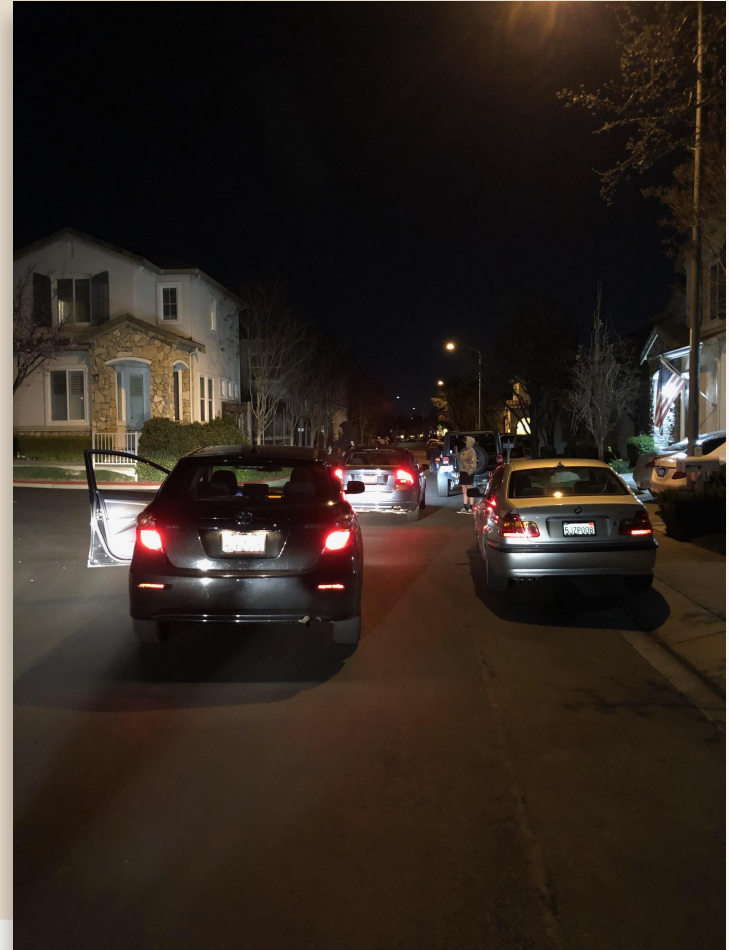

Work

The most fulfilling part of my day is going to job or my internship at a vet hospital. It makes me feel productive and serving others gives my day some purpose.

Assassins

After work I will sometimes go out to help my friends who are still playing assassins. It's nice to see more people from my class even when they are shooting nerf bullets at us. This night there was a gathering of teams outside of someone's house. There were at least 6 teams gathered to watch the kill.

Masks Galore

After a year in this pandemic I have built an impressive collection of masks that I leave in my car for work, my internship, and getting takeout.
