Photoshop CS6/CC Quick Keys

This chart uses the Photoshop Extended tools. Almost every tool in the toolbar has a shortcut key assigned to it. For example, the Marquee tools have the letter "M" assigned. Press M on the keyboard to select the Marquee tool. If there is more than one tool assigned the letter "M" then hold the shift key while you press M to cycle through all the tools with M assigned to it. If there is no letter assigned, you must select those tools manually with the mouse.

Pressing "D" will set the foreground color to black and the background color to white - the default colors. Pressing "X" will switch the foreground and background colors. Clicking on either the foreground or background color swatches will bring up the color picker dialog box that will allow you to choose another color.

Double-clicking on the QuickMask Mode button will bring up a dialog that will allow you to change its options.

Toolbar

- Move Tool (V)
- Rectangular Marquee Tool (M)
- Lasso Tool (L)
- Magic Wand Tool (W)
- Crop Tool (C)
- Eyedropper Tool (I)
- Spot Healing Brush Tool (J)
